PROFESSIONAL SUMMARY

Frontend Developer with 2.4 years of experience building scalable enterprise web applications using ReactJS, Next.js, TypeScript, Redux, and modern frontend technologies. Skilled in reusable component development, state management, performance optimization, AG Grid integration, and unit testing using Jest/Vitest.

SKILLS

- Frontend:** ReactJS, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS ,Storybook ,Responsive Design
- State Management:** Redux, React Hook Form
- Testing:** Jest, Vitest, Unit Testing
- Tools & Platforms:** Git, AG Grid, Auth0, Jira, Figma
- Architecture:** Micro Frontend, Design System, Reusable Components
- Backend :** Java, Spring Boot, SQL

PROFESSIONAL EXPERIENCE

Virtusa Consulting Services Pvt Ltd

Engineer | Client : BMO | ReactJS, TypeScript, AG Grid, React Hook Form Jun 2025- Present

- Developed reusable enterprise UI components for the BMO X Design System using ReactJS and Carbon Design System with Storybook documentation.
- Built multi-step workflow forms using React Hook Form with dynamic validations, centralized state management, and REST API integration.
- Developed real-time trading features using AG Grid with advanced filtering, sorting, and live data updates, improving data handling efficiency by 20%.
- Integrated frontend workflows with backend services and Salesforce through API integration and AMS-based payload processing. Reduced duplicate code by 30% through reusable component architecture.
- Improved application performance by 20% using React performance optimization techniques such as memoization and code splitting.
- Wrote unit test cases using Jest/Vitest and worked with Micro Frontend architecture using Vite and Webpack.

Associate Engineer | Client : Lighthouse Credit Union | Next.js, Tailwind CSS, Auth0 Jan 2024 - May 2025

- Developed responsive mortgage and loan management applications using Next.js and Tailwind CSS.
- Built interactive loan workflows and financial calculator modules, improving application usability by 25%.
- Implemented secure authentication and authorization using Auth0 with protected route handling.
- Worked with responsive design principles and frontend build tools such as Vite and Webpack.

Java Full Stack Intern | Spring Boot, ReactJS, SQL May 2023- Aug 2023

- Developed a Project Management Portal using Spring Boot, ReactJS, REST APIs, and SQL for task tracking and collaboration.
- Implemented responsive UI components and integrated frontend workflows with backend APIs.
- Improved application usability and performance 40% by optimizing frontend rendering, memoization ,code splitting and workflow management features.

CERTIFICATIONS

- Oracle Certified Associate Java SE 8 Programmer, Oracle University.
- Problem Solving,HackerRank
- Python,HackerRank,
- Claude 101 , Anthropic

EDUCATION

Bachelor of Engineering (ECE)

Jan 2019 - May 2023

KPR Institute of Engineering and Technology, Coimbatore
